

# C & tan $\delta$ Meter DAC-TCG-L1 for Dry Test of Transformer

## CAPACITANCE AND tan $\delta$ MEASURING SET

DAC-TCG-L1 is suitable for the drying control of coils in power transformers. Since the testing set with a built-in testing power supply has an analog output of the value of tan $\delta$ , you can monitor continuously the dry condition of coils.

- **Test Specimen** Transformer, Cables, Capacitor, Insulating material
- **Feature**
  - Wide Range: Capacitance : 200pF – 2uF, tan  $\delta$  : 0-100%
  - Test Voltage: AC125V / 250V 50/60Hz
  - Analog Output: DV 0-1V (for capacitance and tan  $\delta$ )
- **Specification**
  - Test Voltage AC125V/250V 50/60Hz
  - Test Range Capacitance : 200pF - 2uF  
tan  $\delta$  : 0 - 100%
  - Resolution Capacitance : 1pF (at 2nF range)  
tan  $\delta$  : 0.01% (at 2% range)
  - Analog Output DC 0-1V (Capacitance and tan  $\delta$ )
  - Power Supply 100V $\pm$ 10% 50/60Hz
  - Size and Weight W430 \* H149 \* D385 (mm) 15kg
  - Accessory
 

|                    |   |
|--------------------|---|
| 1) Measuring Cable | 1 |
| 2) AC code         | 1 |
| 3) Grounding cable | 1 |
| 4) Carrying bag    | 1 |

Specifications are subject to change for improvements without prior notice.
